

## Virtual Instruments:

---

**Grand Piano: "Ivory" @ [www.sythogy.com](http://www.sythogy.com)**

Very realistic grand piano

Beautiful warm pad

Layering of sounds possible

**B3/Hammond organ: B4II @ [www.nativeinstruments.com](http://www.nativeinstruments.com)**

**Legato Strings: Appasionata Strings @ [www.ilio.com](http://www.ilio.com)**

## Loop Production Software/Sequencing software/Audio workstation

---

**Apple "GarageBand" @ [www.apple.com](http://www.apple.com)**

Lots of great virtual sounds

Tons of loops

Transposing of mp3's possible

Record audio into program

There are lots of other great loop/sequencing/audio programs out there.

Digital Performer

ProTools

Cubase

Logic

and on and on...

An application that has amazing potential for us in live worship is Ableton Live.

[www.ableton.com](http://www.ableton.com)

allows for triggering of various sections of songs on demand

this frees worship team to "linger" over an intro, for example, rather than having to perform a predetermined length of any section of the song

Allows easy triggering of drum loops at various tempos throughout a set
